

→ **STOPAQ[®] CZ H PASTE**

Visco-elastic Mouldable Compound

Features

- Excellent immediate and permanent adhesion on steel or other surfaces like PE, PP, FBE
- Long term physical, chemical, thermal and mechanically stable protection
- Impervious to water and gases
- Temperature range -45°C to 70°C (CZ Paste up to 50°C)

**Onshore & Offshore
Rehabilitation and new build pipelines
Underground and aboveground application**

Mouldable Insulating Polymer Coating Compound for above and underground pipeline flanges, valves and fittings up to 70°C operating temperatures

Features

Visco-elastic, fluid-like nature

Amorphous, inert, no stress generation

Stable from -50°C up to 85°C max.

Low surface tension

Cold-flow technology

Non-toxic & no waste

Non-crosslinked

Excellent adhesion to itself

1 component material packed as a bar

STOPAQ® CZH Paste should be mechanically protected by Wrappingband CZH + other protective tapes, sleeves, polyesters etc.

Benefits

- Conforms to any shape

- No undercreep possible

- No osmosis possible

- Will not crack, tear or breakdown

- Applicable at low temperatures below -15°C

- Impregnation of the surface

- Self-recovering properties

- ST 2/3 surface preparation is acceptable

- Steel roughness profile is not critical for coating performance

- Harmless to people and the environment

- Full adhesion into the finest pores of the substrate

- Encapsulates salts and other impurities

- Forms a monolithic coating layer

- Easy to mould by hand
